

NATHAN NGUYEN

Software Developer/ Digital Designer

825 288 0663 | nathanguyen12@gmail.com | Portfolio: https://chinhuhu.github.io/Nathan_portfolio/

Summary

Software Developer and Digital Designer with 4+ years of experience designing, building, and optimizing web applications and digital experiences. Skilled in full stack development, UX/UI design, content management, SEO, and web analytics.

Experienced in leveraging AI-assisted tools to accelerate problem-solving, prototype solutions, and optimize user experiences. Proven ability to bridge technical, design, and marketing teams, delivering scalable, user-focused, and data-driven digital solutions.

Skills

Programming & Web Technologies

- JavaScript, HTML5, CSS3, TypeScript
- React, jQuery, Bootstrap
- PHP, NestJS , Next.js
- RESTful APIs, AJAX, Node JS

Version Control & Workflow

- Git & GitHub (branching, merging, maintenance)
- Agile / iterative development workflows

Databases

- MySQL, SQL, PostgreSQL, Prisma ORM
- Database-driven application development
- Data modeling and performance optimization

Infra/Services

- Railway (backend deploy/runtime)
- Vercel (frontend deploy)
- Cloudflare R2 (S3-compatible object storage)/ CDN/custom media domain

Application Development Concepts

- MVC architecture and separation of concerns
- API integration & asynchronous data handling
- Business logic & data access layering

Digital Experience & UX/UI:

- User journey mapping & personas
- Conversion rate optimization (CRO)
- Website content strategy & management
- Design tools: Figma, Adobe XD, Photoshop, Illustrator, After Effects
- CMS management (WordPress, custom CMS)

Web Analytics & SEO:

- Google Analytics, Google Search Console, Google Data Studio
- SEMrush, keyword research, on-page SEO
- Data-driven content optimization and website performance tracking

AI-Assisted Development

- Using AI tools to research unfamiliar technologies, troubleshoot issues, and validate architectural decisions
- Accelerating development cycles while maintaining best practices and readability
- Automating repetitive tasks and improving development efficiency

Experience (Since 2019)

Co-Founder/ Lead Software Developer Fleet (Beta) - Global	May 2025 – Present
- Architected and deployed a real-time, location-based reporting platform using Next.js, NestJS, PostgreSQL, and Prisma. - Designed and implemented full-stack system architecture across frontend, backend API, database, and media pipeline. - Built secure authentication and RBAC authorization (USER / MODERATOR / ADMIN). - Led migration from local file storage to S3-compatible Cloudflare R2 behind CDN, implementing dual-read compatibility, backfill scripts, and validation monitoring. - Designed scalable REST APIs supporting report lifecycle, moderation workflows, and engagement features. - Managed production deployment via Railway and Vercel, including structured release workflows and smoke testing. - Delivered map-first UI experience optimized for usability, performance, and real-time interaction.	
Key Projects:	
fleetinstant.com	
Software Developer / Front-end Developer Anvy Digital Imaging - Calgary, AB, Canada	Jul 2025 – Jan 2026
- Developed and maintained responsive web applications aligned with operational and marketing objectives. - Integrated REST APIs to support dynamic workflows and real-time data visualization. - Improved website performance and SEO strategy using GA4, Search Console, and SEMrush. - Collaborated cross-functionally with design and marketing teams to translate business requirements into scalable technical solutions. - Maintained structured Git workflows ensuring clean version control and reliable deployment.	
Key Projects:	
vicdigitalworks.com leo-booking.com	
Software & Web Developer Le Tran Share Holder Limited Company - Ho Chi Minh City, Vietnam	Dec 2019 – Nov 2023
- Designed and developed production websites with strong emphasis on UX, visual hierarchy, and performance. - Built frontend interfaces integrated with backend logic and SQL databases. - Led UI/UX improvements to enhance user engagement and optimize digital conversion flows. - Conducted performance analysis and iterative improvements using analytics and user feedback.	
Key project:	
cattienrsa.com	
Digital Developer Memory Express Inc. - Calgary, AB, Canada	May 2024 – Jul 2024
- Supported development and debugging of web-based tools and digital content systems. - Contributed to structured enterprise-level advertising project (Samsung campaign). - Collaborated within team-based development cycles adhering to quality and delivery standards.	
Key projects:	
memoryexpress.com	

Education and Training

Professional Certificate - Web Developer Coursera - Online course Certified	Nov 2018
Diploma - Digital Design Bow Valley College - Calgary, AB, Canada GPA: 3.9 / 4.0	May 2025
